About this course

What we'll cover

In this course, you will learn how to develop solution using Azure AI Services. Topics covered include natural language understanding, computer vision, document intelligence and generative AI. Specifically, you'll learn how to:

- Provision Azure resources and use the service studios
- Train and customize various Azure AI models
- Use APIs and SDKs to consume models from client applications

Intended audience

The primary audience for this course is application developers seeking to include Azure AI functionality in their applications.

Although most Azure AI services can be used with web studios, to use the APIs and SDKs effectively, a basic knowledge of Microsoft C# or Python is recommended.

Course schedule

	Day 1	Day 2	Day 3	Day 4
Early morning	Introduction Get started with Azure AI Service	Wrap up from previous day Develop natural language processing solutions with Azure AI Services	Wrap up from previous day Develop generative AI solutions with Azure OpenAI Service	Wrap up from previous day Develop knowledge mining solutions with Azure AI Search
Break				
Late morning	Get started with Azure AI Service (continued)	Develop natural language processing solutions (continued)	Develop generative AI solutions (continued)	Develop knowledge mining solutions (continued)
Lunch				
Early afternoon	Develop computer vision solutions with Azure AI Services	Develop natural language processing solutions (continued)	Develop generative AI solutions (continued)	Develop solutions with Azure AI Document Intelligence
Break				
Late afternoon	Develop computer vision solutions (continued)	Develop natural language processing solutions (continued)	Develop generative AI solutions (continued)	Develop solutions with Azure AI Document Intelligence (continued) Q&A

Get the most out of your Microsoft Learn profile

Verify, track, and share your training and certification progress and accomplishments—*all on one platform*

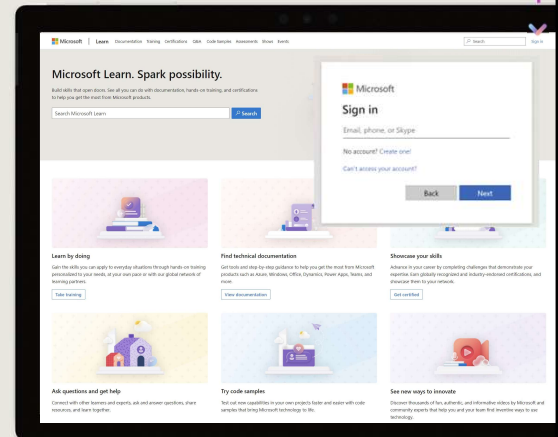

- Claim your achievement code for this course and share you have completed it.
- Access your course material and track progress on your learning activities.
- Share and verify your Microsoft Certifications via email, on social networking platforms, and on your résumé.
- Download and print transcripts and certificates.
- Manage your upcoming activities and certification exam appointments.

This course includes labs:

- Detailed lab instructions are included in your lab environment.
- Each exercise is standalone and requires a Microsoft Azure subscription

<https://aka.ms/ai102labs>

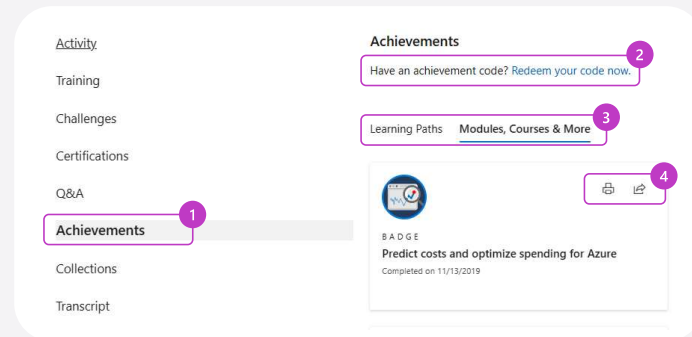

Set student expectations for the lab exercises. For Generative AI, Azure OpenAI is a *restricted access* service that requires approval.

Be clear about the relationship between the slides in this classroom-based course and the associated learning paths on Microsoft Learn. The slide presentations are aligned to the learning paths, but do not necessarily map 1:1 with them. This enables you to provide an optimal learning experience within the constraints of a 1-day instructor-led class, while enabling students to use the supporting online modules to go deeper into some topics and reinforce what they learn during the class.

Celebrate your accomplishments and feel empowered

Get your achievement recognized and earn your badge for completing this course

aka.ms/MyMicrosoftLearnProfile

1. Go to **Achievements** on your Microsoft Learn profile
2. Redeem the code provided by your trainer
3. Find your new badge **on Modules, Courses & More**
4. Share your new achievement with your professional network. You can also download and print your certificate.

Get ready for your Microsoft Certification exam

Exam AI-102: Designing and Implementing a Microsoft Azure AI Solution covers the features and capabilities of Microsoft Azure AI Services, including Azure OpenAI Service

Understand the skills measured by the exam

Study area	Percentage
Plan and manage an Azure AI solution	15–20%
Implement decision support solutions	10–15%
Implement computer vision solutions	15–20%
Implement natural language processing solutions	30–35%
Implement knowledge mining and document intelligence solutions	10–15%
Implement generative AI solutions	10–15%

Percentages indicate the relative weight of each area on the exam
The higher the percentage, the more questions you are likely to see in that area
